- Must follow Skate Canada guidelines: <https://info.skatecanada.ca/hc/en-ca/sections/200379180-New-CanSkate-Program>

 - Clubs will have to indicate which club(s) are participating at the event.

 - Clubs can only participate in one CanSkate Element Event per skating season. This is the only CanSkate Element event open to skaters of that club for the skating season.*
- * Skaters are bound by the decision of their home club and attend the event selected. The events may be held in one of the following manners:

From SC LTAD Manual – Learn to Skate

Competition³

In the Learn to Skate stage, the primary focus is skill development.

For skaters aged three to five there is no need for any sort of competition. All of their time on the ice should be dedicated to training, as outlined above.

For skaters aged 5 to 8/9, skill presentation/performance should be introduced. Introducing this at an early age can help identify possible talent as well as instill expectations for later development. Skaters do not need to be performing programs at this level but rather focus on elements based on fundamental movements and motor abilities.

Skill presentation should be in the context of participation in fun team meets at the club level where rewards are given but no ranking occurs. These can be held once in a 10 week session ideally with a focus on performance and not competition.

Evaluations are done by coaches with a goal for skaters to achieve a desired performance level for individual achievement.
